

Scope

CPI'2026, hosted by the Faculty of Sciences and Techniques of Fez (FST), Sidi Mohamed Ben Abdellah University, and the LaRSI Research Laboratory, aims to bridge conceptual, methodological, and technological approaches in integrated design and production.

The conference brings together researchers, industry professionals, and decision-makers to exchange recent advances in digital modeling, structural analysis, intelligent design, integrated manufacturing, and sustainable and connected industry.

Key fields include civil engineering, geotechnics, mechanical engineering, and materials science. Supported by the CNRST and major industrial partners, CPI'2026 promotes research–industry collaboration, public–private partnerships, and innovation for sustainable industrial development.

By participating in CPI'2026, attendees will benefit from :

- In-depth insights into advanced products, implementation strategies, and emerging industry trends
- Networking opportunities with experts across all facets of design and production
- A platform to share experiences and best practices with the scientific and industrial community
- Exposure to innovative solutions aimed at enhancing performance and sustainability
